### ABOUT N+P?

For over 25 years N+P Group contributes to a better and greener world. We are doing that by pioneering with and being the market leader in the production and supply of alternative raw materials and fuels, based on non-recyclable waste. We convert non-recyclable waste streams into alternative raw materials to replace conventional raw materials and fossil fuels for various global industrial applications. The goal of N+P is to become a leading producer and supplier of sustainable raw materials and fuels worldwide. More information can be found at [www.npgroup.com](http://www.npgroup.com)
